

# HARVEST

*Angus*

# BULL SALE

SATURDAY  
**march**  
**2019 9th**

1pm  
BC Livestock  
Williams Lake, BC

# WELCOME

Time rolls on over at Harvest Angus. Bull Sale is fast approaching and once again I must say we are humbled to see so many customers, who have become good friends, return again to support us. Your friendship and support we do not take lightly. We want our genetics to go on to enhance your program. If you are not happy, we are not happy. Last year brought out a boat load of smoke from the fires. We ourselves were under a smoke cloud for weeks as well. The lack of summer moisture put a lot of stress on the feed situation for many producers, so we, like so many others, look toward 2019 with a renewed optimism. Last year's female sale at the Ranch was a blast. We enjoyed a very brisk sale with lots of friends coming by and participating. I would also like to thank all you folks that have come and visited the ranch and toured the cow herd. We ourselves were humbled that you visited and we very much enjoyed your company and talking cattle with all of you.

Also, I would like to introduce Mr. Bronc Twan. To many of you, Bronc is no stranger and we have retained his services as our field representative for bulls. You can find Bronc at most cattlemen's functions throughout the Cariboo. Also, that very nice lady you see running around at the sales taking photos is probably his better half, Liz. I believe that Bronc's knowledge and common sense approach to the cattle business will be an added bonus to our marketing program and if you have any inquiries, Bronc is more than willing to hear them.

We still have the same rules in our program as we always have had and they are:

1. Fertility - Our cows that calve before February 10th each year are synchronized to be AI bred for a January 1st calf. 14 days later they are put in with the bulls for 45 days, that's it. We don't run our bulls with our cows on grass. All cows are ultrasounded before they are turned out on grass (we will already know if she's in calf).
2. Sound Feet and Legs - Our cows, like yours, have to travel a great distance for forage. So cows with bad feet and legs have no room in this program.
3. Sound Udders - Big teated cows need not APPLY. We love good uddered cows that have a desirable teat size. When the calf hits the ground it can get a teat in its mouth to nurse.
4. Quiet Dispositions - There are two men that work cattle in our operation and depending on the time of day during calving season. Lots of time you can find you are working by yourself. We don't tolerate mankillers.

These are the rules in our outfit for cows. If they fall in one of the four categories they are gone to town and we believe that with strong maternal qualities that we insist on from the cows and selectively use high performance sires we can produce bulls that can go to work for the most discriminative Cattleman. We try to resource the best genetics from all over to produce athletic bulls that have the ability to produce an average size calf with strong weaning and yearling weights that will convert into dollars for our customers. We are constantly looking for outcross bloodlines to instill the vigor that everyone wants in their cattle if your plan is to keep some replacement females.

ALL BULLS WILL BE SEMEN TESTED

ALL BULLS WILL BE ULTRASOUNDED

ALL BULLS WILL HAVE THE FIRST VACCINATION FOR FOOT ROT

ALL THE BULLS IN THE SALE WILL HAVE BEEN TESTED FOR TB & BANGS PRIOR & WILL HAVE HEALTH PAPERS FOR IMMEDIATE SHIPMENT TO THE USA

As I wrote the footnotes on the bulls offered for sale this year, you will notice I like to speak of the bulls dam and Sire. I do this because I believe you must have strong Maternal and Paternal power in a good herd bull I prefer to let the bulls offered for sale today to speak for themselves.

We would like for you to attend, but if you can't, feel free to contact us with your specifications on a bull and we will endeavor to select a bull of your liking. And remember if he's not right you don't own him. Just call Tom. Also we have Mr. Clint Ellis from Ellis Cattle Company. Clint is one of the largest cattle order buyers in BC and he will be in attendance at the sale. If you wish to call Clint he can also handle your bull purchase as well. See you sale day!

*Tom*

If you like bulls full of muscle, you're going to like this fellow sired by Cash Flow. His dam has been a stand out cow in our herd. This bull is in the top percentiles of the Angus breed for WW, YW, TM and REA. He also looks the part as a Cattleman's bull. He has a brother at Dunlevy Ranch and sisters at Poplar Meadows and Walkerbrae Farms.

**Choice of 1/2 or full possession**

Here's one of the feature bulls of the offering. We showed this bull all year last year & had a real blast doing it. An old mentor of mine once told me that when they come from nothing, they will breed nothing. Well, that's sure not the case with this fella. His dam is a Tiger daughter & his grand dam is the 145P cow. She has 17 Daughters & 15 of them are still in our herd today. This bull possesses all the things we love to see in a bull. A great set of feet & legs, natural muscle, length of spine & a demeanor second to none. He has been a true pleasure to work with & I believe he will be a true asset to the successful buyer.

Here is another Cash Flow son full of red meat and walks out great. Look at the weaning and yearling numbers on this bull, you will be impressed. His dam ended her career with us this past year, but we have been very fortunate to have had such a wonderful cow to work with. She left behind 12 offspring. 6 bulls sold to programs such as the Marguerite Ranch, C1 Ranch and Zanberg Farms, and who can forget Harvest Admiral. He was the Reserve Champion Bull in his division at Edmonton Farmfair a few years back, and now walks the pastures at Lazy B Livestock and Harvest.

Another Sensation son if you have some heifers to breed. What we were really impressed by was Sensation's ability to sire sons with low birth rates and not giving up on performance. His mother has been a stand out cow in our program. She has had 5 calves with a son going to the Bar K and daughters going to Dunlevy Ranch, Joanne Cook and LLB Angus.

A Tour of Duty son. We used his sire exclusively for a few years with great success. What we really enjoyed about them is the long spine and extra rib, great feet and legs, lots of guts and big nuts. The females have been great milkers from near perfect udders, we can't say enough about them.

I love this young bull and I really love is momma. It's Jan 8th and just this morning she laid down and delivered us another bull calf. The 31B cow is probably one of the nicest tempered animals you could ever work with, plus she weans of some of the best animals we have produced last year. Lee Migbar from Telegraph Trail Ranch seen her bull in the pen and needed to own him. It's always great to see your genetics get out and do great things for great people.

Remember 2 years ago through this very sale, a young bull sired by O'Rielly Factor that commanded 15,500? That day, he was the selection of Brian Steepstra from Liske farms of Black Creek, BC. We at Harvest retained a half interest share in the bull and we used him in our program. Here's one of the resulting sons. Moderate birth weight with high weaning and yearling weights make using these kinds of genetics pay dividends.

A low birth weight Admiral son out of a Stingray dam. Drew Burke purchased one of the top end Admiral bulls here a couple years ago and is using him in his program. Stingray, of course, was a walking bull we used for quite some time. I sold him last year to Kevin Johnson. Just ask Kevin what he thinks of him. This bull has all the genetic values to be your next herd sire in a great looking package.

I like to ask people the same question all the time when it comes to heifer bulls (Do you just want them for heifers?). If the answer is yes, I think you might have just found your bull. This fella's sire, Cognac 23'15, we've had since a yearling and his mature weight is 1700. To me he is a perfect heifer bull and this year, again, we will use him on heifers. He never got too big so you were not forced to use him on cows, but this fella has an added bonus. Look at the weaning and yearling numbers. Here is a true heifer bull in the making.

Impressed is what a person who is a student of numbers should be when you look at the EPD on this bull. He is in the top percentiles of the breed in 7 out of 8 of the categories, not including carcass merits. Sired by Black Gold, this bull puts all the numbers together. A true heifer bull with extremely heavy weaning and yearling numbers that can help you take your heifer's calf crop to a new level. Also, when you look at the structure of the bull on his own merits, you come up with a complete package.

Here's a heifer bull that needs to be looked at come Sale Day. Sired by Charlo with low birth and heavy weaning and yearling ratios, he will be the type and kind that will help you sleep better and take you to the pay window next fall after the calf sale. When you look at him, he commands your attention. A bull with an enormous amount of style.

Sired by Warrior, this bull is one to take out and use on your cows. If you want to add some pounds to your calf crop, look at the weaning and yearling predictions on this bull. If you sell your calves by the pound, this fella should enhance your calf crop.

Here we have an Exar Classen son out of the 501 cow. Classens have been known to be performance based cattle with great eye appeal. If you're looking for a bull to go out and cover a bunch of cows, look him up on Sale Day.

A Yeager son you're sure not going to miss on Sale Day. A real stand out since birth. I am sure the calf crop from this guy will out-perform come fall. He's going to cover ground and breed cows.
