HOT OFF THE TRUCK FROM HI HOG!! 2014 TORNADO CATTLE FEEDERS

Save Hay, Save Time, Save Money

“Considering the substantial effort required to produce high-quality hay, an equal effort should be made to minimize the losses from contamination and waste during the feeding process. Too often, a round bale is dumped into a field and, within a few days, the livestock tear the bale apart, defecate and urinate on it, tramp it into the ground and use the remainder as expensive bedding. Without the protection of a bale feeder, as much as 50% of the dry matter content of bales can be lost.”
