TERMS AND SALE CONDITIONS

CATTLE INSPECTION: All cattle carry permanent identity tags corresponding to Sale Tag Numbers. All shall be available for viewing prior to sale.

ANNOUNCEMENTS: Errors discovered in the catalogue will be corrected by announcements from the auction stand at the time of sale. Such corrections will take precedence over the printed matter in this catalogue.

INSURANCE: Ownership risk of purchaser commences when the Auctioneer's hammer falls.

DISPUTES: In the case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from who the auctioneer accepted the last bid. The auctioneer's decision on all disputes is final.

TERMS OF SALES: All cash or cheques are payable at par to the Clerks of the Sale on sale day. US Funds will be accepted at the current rate of exchange. No release will be given until Satisfactory settlement has been made. We reserve the right to withhold export shipment of cattle for whom payments have not been received prior to departure times.

ALL PERSONS who attend the sale do so at their own risk. The Owners, management, and sale staff assume no liability, legal or otherwise, for property loss or for any accidents that may occur.

BREEDERS GUARANTEE: All bulls will be semen tested and carry the Breeder's personal guarantee.

EPD Definitions

Growth EPDs

BW = Birth Weight: Expressed in lbs, predicts on average how much heavier or lighter than the breed average an animal's calves will be. If the breed average is 3 and an Angus animal has a BW EPD of 5 then on average this animal's calves will be 2 lbs heavier than the breed average.

WW = Weaning Weight: Expressed in lbs, predicts comparative progeny weight at 205 days of age. This EPD reflects pre-weaning growth potential that an animal is expected to contribute to its calves.

YW = Yearling Weight: Expressed in lbs, predicts the differences in progeny performance at 365 days. The YW EPD reflects the animal's calves' potential for post-weaning growth.

Fertility Trait EPDs

Milk = Milk: Expressed in lbs. of calf weaned, this is a prediction of an animal's daughter's milking ability.

TM = Total Maternal: A measurement comprised of half of an animal's Milk EPD and half of its additive genetic contribution to its calves' weaning weights.

CE = Calving Ease Direct: Predicts the percentage of unassisted birthings expected from an animal's calves. This EPD reflects a combination of gestational growth and a calf's conformation. The higher the CE EPD, the more likely it is that the animal's calves will be born without assistance.

MCE = Maternal Calving Ease: Predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers. MCE is expressed in percentage unassisted births with a higher value indicating greater calving ease in first-calf daughters.

Spring 2019 Genetic Evaluation Breed Averages

Average Black EPDs for all Calves born in 2019

	BW	WW	YW	MILK	TM	CE	MCE
EPD	+2.0	+47	+83	+22	+45	+3.6	+7.2

Tafika Angus would
like to thank you for attending the
Angus Advantage Bull Sale.
Please join us for coffee and
dessert following the conclusion of
the sale.
